INSIGHT WORKS

CYCLE COUNT SCHEDULER

for Microsoft Dynamics 365 Business Central

Keep your inventory in check with automatically generated cycle counts based on velocity, location, item criteria and frequency.

Cycle Count Scheduler by Insight Works revolutionizes inventory management for Dynamics 365 Business Central users. The app auto-generates schedules based on item velocity, location, type, and counting frequency. Alongside Advanced Inventory Count, it simplifies counts, enhances reporting, and aids in meeting compliance. With customization and automatic distribution of counts, it adjusts to counting progress and user availability, optimizing operations for single or multiple locations.

Unleashing the Power of Smart Inventory Management

- **Increased Accuracy:** Enhances inventory precision by scheduling regular cycle counts based on various critical factors.
- **Improved Efficiency:** Optimizes inventory management by automating cycle counts, freeing up resources for other tasks.
- **Better Stock Control:** Manages stock levels more effectively by identifying fast-moving items and adjusting counts accordingly.
- **Business Insights:** Offers valuable insights into inventory trends through real-time analytics, informing strategic decisions.
- **Reduced Overstocks and Stockouts:** Minimizes costly overstocks and disruptive stockouts through tailored cycle count frequencies.
- **Time and Cost Savings:** Streamlines the cycle counting process, saving time and operational costs.
- **Effective Anomaly Detection:** Swiftly detects and addresses inventory discrepancies, mitigating potential losses.
- **Enhanced Collaboration:** Facilitates team coordination with multi-user capabilities, leading to faster and more effective cycle counting.
- **Proactive Inventory Management:** Provides automated reminders for upcoming cycle counts, ensuring proactive inventory management.
- **Customized Prioritization:** Enables businesses to prioritize certain items or locations for cycle counting based on specific needs.

Typical Users:

Inventory Managers

Warehouse Supervisors

Supply Chain Analysts

Operations Managers

Retail Store Managers

Distribution Center Managers

E-commerce Business Owners

Procurement Officers

Logistics Coordinators

CYCLE COUNT SCHEDULER

Automated Scheduling: Tailors cycle counts per item traits, location, speed, and frequency.

Multiple Location Schedules: Allows numerous cycle count schedules and custom calendars per location.

Schedule Generation: Facilitates manual/automatic scheduling via a job queue, merging count sheets.

Full Coverage Configuration: Sets full count coverage and frequencies to specify cycle count items.

Item Selection: Defines coverage list with filters by count codes, SKU fields, item activity, and stock status.

Email Count Sheets: Auto-emails count sheets in PDF/Excel.

Velocity-Based Calculation: Utilizes inventory speed for cycle count intervals, optimizing stocks.

Location-Specific Counts: Performs counts per location, suitable for multi-warehouse firms.

Item Criteria Filtering: Plans counts based on item specifics for accurate inventory.

Frequency Customization: Defines count frequencies per business needs.

Real-Time Analytics: Gives live reports on cycle count performance and inventory status.

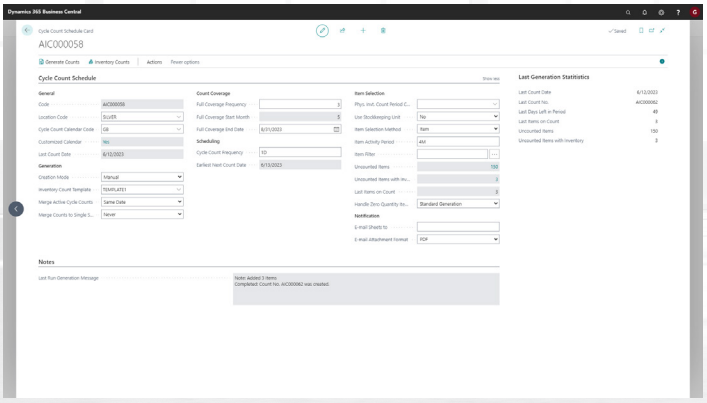

Integrated Notifications: Auto-sends reminders about upcoming cycle counts.

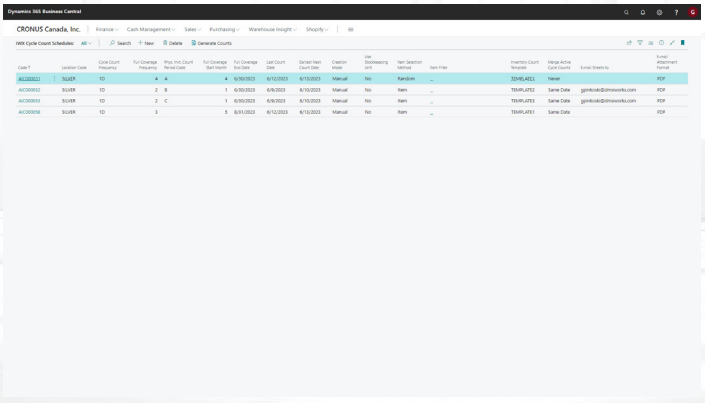

Easy Prioritization: Allows priority level setup for cycle counts per needs.

Exception Handling: Identifies and alerts inventory anomalies for correction.

Multi-User Capability: Facilitates simultaneous cycle counts by multiple staff, boosting efficiency.
