# PRODUCT CONFIGURATOR

for Microsoft Dynamics 365 Business Central

## Simplify creating BOMs and routing to make quote and order generation more efficient.

Product Configurator is an add-on for Dynamics 365 Business Central that simplifies the creation of production BOMs and routings, allowing for easy selection of product options and variations.

With features such as automated BOM and routing generation, bulk configuration builder, and an easy-to-use interface, Product Configurator reduces manual input and increases accuracy in sales quotes and orders. It seamlessly integrates with standard Business Central MPS and MRP to properly plan new products, and is a cost-effective solution for businesses of any size looking to streamline their sales process and boost productivity.

### Customize and Conquer with Product Configurator

- **Time-saving and improved efficiency:** Product Configurator streamlines the sales quote and order process, allowing you to complete more orders in less time.
- **Simplified order processing:** Reduce errors and improve efficiency with our easy-to-use ordering interface.
- **Increased productivity:** Product Configurator simplifies the sales process, reduces data entry time, and improves overall productivity.
- **Improved order accuracy:** Product Configurator automatically generates assembly or production BOMs/routings, improving order accuracy.
- **Flexible customization options:** Product Configurator offers flexible customization options, allowing you to meet the specific needs of your customers.
- **Affordable solution:** Product Configurator is affordable and suitable for businesses of all sizes.
- **Seamless integration with Dynamics 365 Business Central:** Product Configurator integrates seamlessly with Dynamics 365 Business Central, allowing for proper planning of new products through standard Business Central MPS and MRP.

### Typical Users:

**Sales and customer service representatives** who need to create accurate and timely quotes and orders for customers.

**Production planners and engineers** who need to create production Bill of Materials (BOMs) and Routings for the manufacturing of products.

**Product managers** who need to define product categories and options for sales personnel to easily select options to build new products or reuse existing configurations.

**Business owners** who want to improve productivity, reduce errors, and increase profitability by automating the creation of BOMs and routings.

**IT professionals** who want to implement a flexible and customizable solution for their organization's product configuration needs.

# PRODUCT CONFIGURATOR

### Automate BOM/Routing Generation
Automatically generate Assembly or Production BOMs/Routings on Sales Orders and Quotes.

### Integrate with Business Central Planning
Seamlessly integrate with standard Business Central MPS and MRP to plan new products.

### Calculate Weight and Cost
Compute the weight and cost of configured items based on chosen options.

### Assign New Item Numbers
Create new item numbers or inherit from the base item number for configured items.

### Multiply BOMs for Waste and Trim
Apply multipliers to automatically generated BOMs to include excess waste and trim material.

### Create Advanced Product Rules
Build advanced rules for specific products using the C/AL Editor API.

### Customize with Ease
Utilize the Bulk Configuration Builder, Configurator Options, and Advanced Rule Builder for flexible customization.

### Display Options and Descriptions
View configured options and their descriptions in the BOM Designer.

### Easier Data Entry and Editing
Show additional columns for configured item data in the Bulk Editor for seamless data entry and editing.

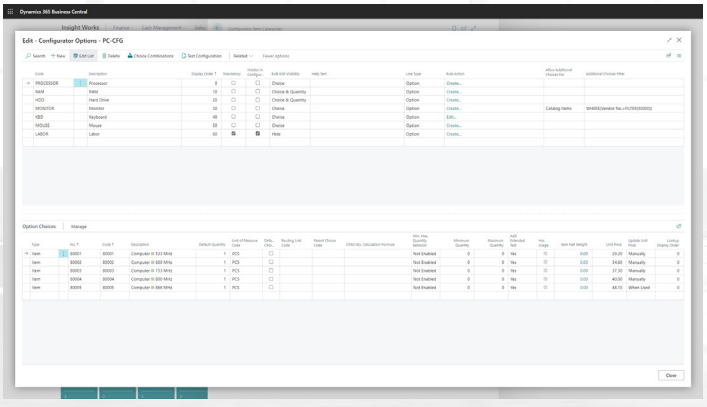

### Automatic Standard Cost Calculation
Automatically calculate the standard cost of a configured item based on the selected options and their costs.

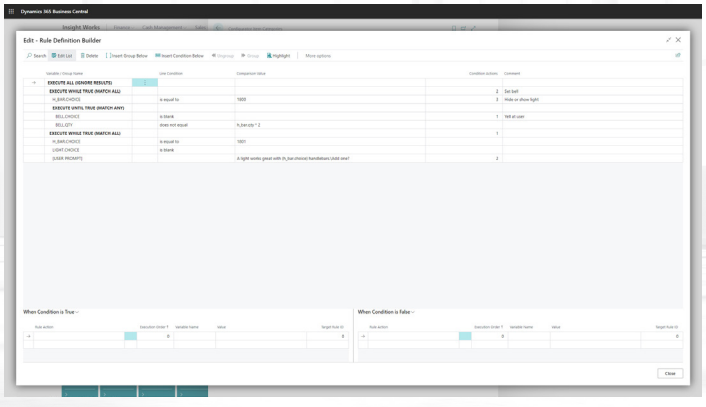

### User-Friendly Configuration
Provide an easy-to-use interface for adding and configuring line-item options.

### Support for Complex Items
Support simple and complex items with a wide range of configurable options.

### Seamless Business Central Integration
Seamlessly integrate with Dynamics 365 Business Central for efficient business planning.
